

*LiDAR Industry's Newest "Grand Slam" Software Suite*

"Our industry has been growing so rapidly over the last 5 years and business has been good. But we have been making do with many different applications just to get projects out the door. I'm glad a company has taken a step back and designed a robust integrated application to address our market needs for the next 5 years of growth."

**VG4D Production Manager™**

- Stand alone; no 3rd party software required
- Comprehensive process-oriented workflow management
- LAS 1.1 compliant
- Advanced filtering and editing tools
- Production metrics and report generation

**VG4D Data Manager™**

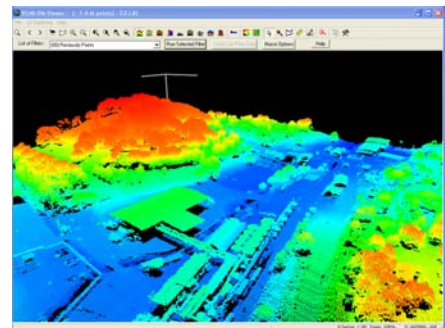

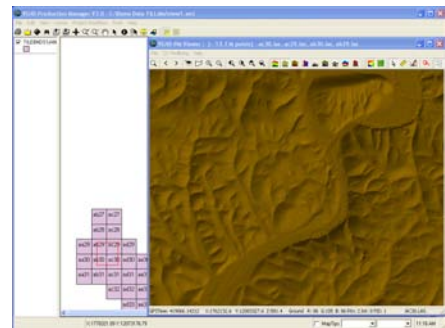

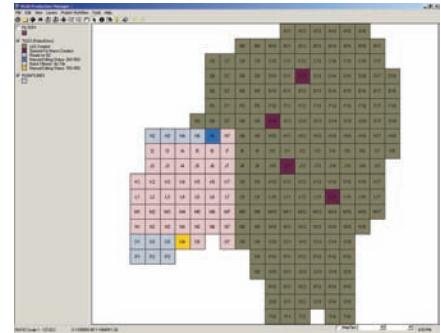

- All the database power of the Production Manager to support elevation data organization, visualization, quality inspection, database tracking, visualization and exploitation of 3D data
- Powerful 3D visualization tools, with integrated manual edit and reclassification tools
- The "lite" manager with production metrics and report generation

**VG4D Viewer™**

- A free powerful, easy to use 3D data viewer
- Visualization modes include - shaded relief, elevation, return intensity shading, color by classification, color by flight line, color by collection date, pseudo-contours and LSF™
- Intuitive 3D rotation, panning, zoom tools, vertical exaggeration, azimuth, and on-the-fly TIN rendering
- GPS time, coordinate, return, intensity and filename readout by cursor location

**VG4D Product Training**

- Complete documentation with an easy-to-follow tutorial and user guide
- Standard off-the-shelf overview training for experienced LiDAR professionals
- Standard off-the-shelf detail training for entry-level users includes the following:
  - Project setup
  - Import flightlines
  - Create import tile boundaries
  - Create tiles
  - 3D viewer
  - Filter setup, overview of various filters
  - Uses and parameters
  - Macro creation and execution
  - Batch filtering by tile or polygon
  - Manual QC and edit process
  - Final QC and product generation
  - Reports and metadata
- Fit your organization's needs -- custom tailored training available upon request
- Maximize your operations - implementation consulting services available upon request

**VG4D Support**

- All products have phone support 8am-5pm Central Time 1-877 VG4D WIN xt 111
- Extended hours support via email access support@virtualgeomatics.com
